

**A RESOLUTION
BY FINANCE/ EXECUTIVE COMMITTEE**

A RESOLUTION AUTHORIZING THE MAYOR OR HER DESIGNEE TO ENTER INTO A PURCHASING AGREEMENT PURSUANT TO SECTION 2-1601 ET. SEQ. OF THE CITY OF ATLANTA CODE OF ORDINANCES, WITH REMINGTON ELSAG LAW ENFORCEMENT SYSTEMS, LLC, PURSUANT TO THE NATIONAL ASSOCIATION OF STATE PROCUREMENT OFFICIALS CONTRACT NUMBER PC62119 FOR THE PURCHASE OF TEN (10) REMINGTON ELSAG MOBILE LICENSE PLATE SYSTEMS, TEN (10) INTERNAL MOUNTED VIDEO CAMERAS, AND VEHICLE INSTALLATION AND WIRING, ON BEHALF OF THE DEPARTMENT OF POLICE, IN AN AMOUNT NOT TO EXCEED ONE HUNDRED NINETY EIGHT THOUSAND THREE HUNDRED FIFTY DOLLARS AND NO CENTS (\$198,350.00); ALL CONTRACTED WORK SHALL BE CHARGED TO AND PAID FROM FUND ACCOUNT AND CENTER NUMBER 3P02 (TRUST FUND) 575001 (EQUIPMENT) X11W02AL9998 (RICO-STATE); AND FOR OTHER PURPOSES.

WHEREAS, the Department of Police ("Department") is committed to reducing crime within the City of Atlanta ("City"); and

WHEREAS, as part of its efforts to reduce crime, the Auto Theft Task Force Unit of the Department is dedicated to identifying stolen vehicles and apprehending auto theft perpetrators; and

WHEREAS, the Department desires to utilize existing technology by obtaining equipment that is capable of reading license plates and comparing them against a database of stolen or other wanted vehicles, thereby enabling police officers to detect vehicles of interest and apprehend suspects; and

WHEREAS, pursuant to Section 2-1606 of the City of Atlanta Code of Ordinances, the Chief Procurement Officer may procure supplies, services or construction items through contract established by the purchasing division of the state where such contracts and contractors substantially meet the requirements of this Article; and

WHEREAS, the Chief of Police and the Chief Procurement Officer recommend utilizing the National Association of State Procurement Officials Contract Number PC62119, to purchase ten (10) license plate systems, ten (10) video cameras and installation and wiring cost, to perform daily operations.

THE CITY COUNCIL OF THE CITY OF ATLANTA, GEORGIA, HEREBY RESOLVES, that the Mayor is authorized to enter into a purchasing agreement with Remington Elsas Law Enforcement Systems Inc., utilizing the National Association of State Procurement Officials Contract Number PC62119, to purchase ten (10) license plate systems, ten (10) internal mounted video cameras, and installation and wiring costs, on

behalf of the Department of Police, in an amount not to exceed One Hundred Ninety Eight Thousand Three Hundred Fifty Dollars and No Cents (\$198,350.00).

BE IT FURTHER RESOLVED, that all contracted work shall be charged to and paid from Fund Account and Center number 3P02 (Trust Fund) 575001 (Equipment) X11W02AL9998 (Rico-State).

BE IT FURTHER RESOLVED, that the City Attorney is directed to prepare an appropriate Agreement for execution by the Mayor.

BE IT FINALLY RESOLVED, that the Agreement will not become binding upon the City and the City will incur no liability under it until it has been approved by the City Attorney as to form, executed by the Mayor, attested to by the Municipal Clerk, and delivered to the contracting parties.

Ms. Janet Anderson-Bennett
Senior Budget Manager
Financial Management Unit
Atlanta Police Department

Dear Ms. Anderson-Bennett:

The Atlanta Police Department Auto Theft Task Force Unit is dedicated to the reduction of Auto Thefts through tactical enforcement and apprehension. We are in constant search for methods that will enhance our ability to achieve this goal with the highest success rate. Towards this end the Auto Theft Task Force Unit has researched and identified new technology capable of reading tags and comparing them to a database of stolen vehicles. The two companies offering this technology allowed the ATTF Unit to test their systems in real-time to assess its functionality and benefit to the department so as to give us the ability to make an informed decision on these products.

The tag reader system Tag Nabit is a hand held unit found to be very cumbersome that provided intermittent returns on tags. The Remington ELSAG system offered alternative mounting capabilities achieving optimum results. The tested Remington ELSAG system magnetically mounted was comparably superior in its functionality to the Tag Nabit system. Additionally, the Remington ELSAG system has a number of uses; including the detection of stolen vehicles, stolen license plates, and wanted persons with known license plate numbers, and the ability to assist law enforcement in accomplishing its mission related to infrastructure protection involving large parking areas such as airport settings, assistance with special security events and disaster preparedness. The Remington ELSAG system's alternative mounting and functionality allows for law enforcement to clandestinely monitor such events from a variety of locations providing a more useful crime fighting tool to the department.

The Remington ELSAG system is uniquely and solely designed for the mission of law enforcement. It is presently being used by several other major law enforcement agencies with great success. The Metropolitan DC Police Department and the Maryland Police Department, in a joint venture, captured thirty-eight stolen vehicles in one day with Remington ELSAG system. The Auto Theft Task Force has had similar success in their apprehension of carjackers, car thieves, and the recovery of several stolen vehicles during the testing period.

The Atlanta Police Department's test comparison of the two systems found that the Remington ELSAG system provides a much higher standard of performance required for law enforcement use that is only available by Remington. Please feel free to contact me directly, if you require any additional information on this product.

Sincerely,

A handwritten signature in black ink, appearing to read "Lt. V.S. Dalton". The signature is stylized with a large, looping "D" and a crossbar that extends to the left.

Mobile License Plate Hunter
FOR LAW ENFORCEMENT USE

MPH900
Mobile Plate Hunter 900 Series

A New Alliance Breakthrough System

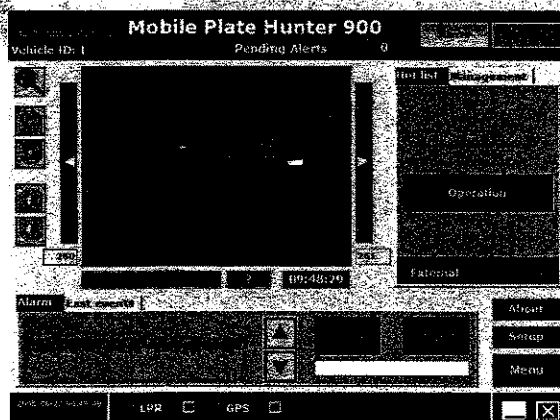

Stopping Auto Criminals Cold

The average law enforcement officer sees thousands of vehicles every day. They can't possibly run the license plates of every vehicle they see. So there's never been a way to be 100% sure that you're not letting a stolen car, a fugitive or terrorist suspect ride right past you.

Until now. Introducing the Remington-Elzag Mobile Plate Hunter 900 - your secret weapon in the war against vehicular crime.

The MPH 900 is the product of a partnership between Remington's 180 years of experience in law enforcement equipment and the cutting-edge innovation of ELSAG, a division of Finmeccanica, a global leader in defense technology.

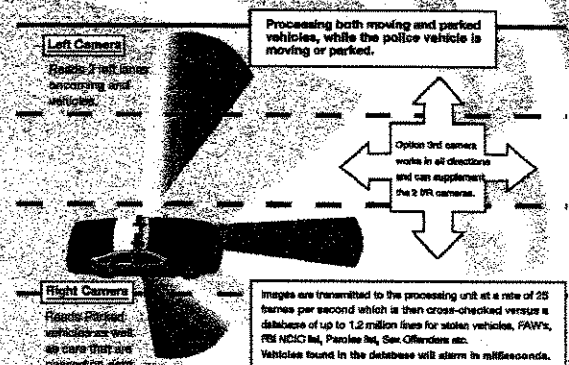

The end result is the most sophisticated system for detecting criminals on the move and finding vehicles of interest. A true force multiplier, the MPH 900 monitors, cross-checks, queries, matches and identifies plates at super-human speed - whether mobile or stationary.

- Red Bar indicates direction of alarm vehicle
- Up to 120 characters for alarm description
- Alarms may be sent via GSM to Command Center Dispatch

With its high-tech progressive infrared cameras the MPH 900 can:

- Read license plates from all 50 states and Canada day or night - in any weather.
- Read parked and moving vehicles across 4 lanes, including oncoming traffic and in the left lane.
- Capture and read over 20 images per second.
- Capture 1.5 million images without a download.
- Cross-check with a hotlist database of up to 4 million lines.

Cameras can be adjusted for your requirements. And the MPH 900 does all of this automatically, without driver intervention, in milliseconds, alerting you to:

- Stolen
- Wanted
- Expired Registrations or Licenses
- Scofflaws
- Terrorist Suspects
- Sexual Predators
- Parole Violators
- Outstanding Warrants

Essentially, it means that no criminal ever drives by you again.

Law Enforcement Results

Throughout 2004-05, the MPH 900 has been deployed by various agencies throughout the US and there have been some very impressive results.

- Suffolk County PD's Highway Patrol Unit deployed the MPH 900, and in its first ten weeks, as part of a traffic enforcement initiative on the Long Island Expressway it showed these preliminary results:

- 202 shifts
- 537 valid alarm interdictions
- 1,491 summonses for suspended tags, suspended D/L were found 42% of the time
- An average of 2.7 summonses per pursued alarms

While processing interdictions, 1,334 alarms were missed that would have delivered an additional 3,682 summonses!!!

- The Metropolitan DC Police Department put 5 MPH 900 units on unmarked cars to seek stolen vehicles and wanted persons in a three day sweep (average patrol time totaling 21 hours).

These units:

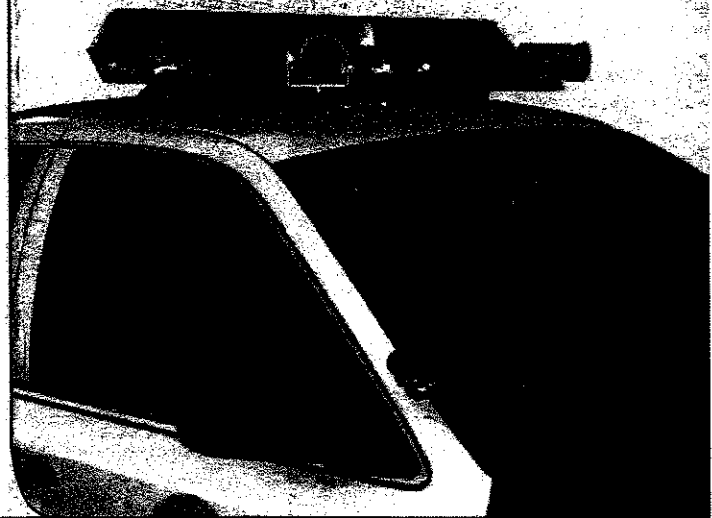

- Read 59,650 plates
 - Recovered 38 stolen vehicles and 1 tractor trailer
 - Identified 5 carjacking vehicles
 - Recovered 14 stolen plates
 - Triggered 2 bench warrant alarms
 - Recovered 3 guns
 - Average time between alarms was 23m:20s
 - Totaled 54 alarms with interdiction
 - Resulted in 18 arrests
- In our first year, the MPH 900 has supported U.S. Law Enforcement with:
 - Over 800+ stolen vehicles and plates
 - Over 300+ arrests throughout the U.S.

Meeting The Future Of Law Enforcement

Able to be mounted on cars, buses, bridges, parking lots, or stationary points along the highway, the MPH 900 is perpetually on the job - whether you're in pursuit, at a scene, interviewing or on surveillance. By giving you the hard facts you need to make the right decision instantly, it enhances officer safety and effectiveness.

Combining Remington's heritage of reliability and ELIAC's world-class technology, it's the best system available for the detecting and effecting interdiction on vehicles of interest.

Scalable, easily integrated and demonstrating proven effectiveness and reliability, the MPH 900 is more than a mere traffic enforcement and collection tool. It's an ever-present, silent partner that will prove a key element in future law enforcement strategy.

Product Line-up

MPH-900 Network Command Centers

- Command and control all LPR activities in your jurisdiction with a cutting-edge communication center.
- All fixed and mobile LPR are networked via command center software and wireless/GSM communication network.
- When an alarm goes off in the field, the Command Center Dispatch is notified and can provide required backup and support.

Mobile Plate Hunter – 900 Series

- 3 Lane System Transportable: for ease of use and city patrols.
- 4 Lane Split Cameras: for Highway Patrols and front plate states.
- Covert Systems: for hiding the MPH-900 on an undercover vehicle.

Product Line-up

Wolf Pack LPR Network Series

- Real time communication tool connects up to 2 additional support vehicles to the LPR vehicle in car alarm activity.
- Allows immediate back up on the scene for the ultimate in officer safety.
- The Wolf Pack has always "GOT YOUR BACK."

Fixed Cameras

- Gate and High Speed cameras can be permanently mounted on overpasses, turnpike gates, traffic lights.
- Easily Networked with mobile cameras in the MPH-900 Network.
- High Speed cameras can read in excess of 120MPH.
- Covert systems hidden in common objects.

MPH-900
Mobile Plate Hunter 900 Series
